

EMC {code}

Community Onramp for
Developer Enablement

"CODE OPEN, DEPLOY EVERYWHERE" - EMC believes in open source.
CODE is here to share and collaborate with developers worldwide.

HELLO WORLD

Happy belated Valentine's Day! We hope you found time to enjoy the weekend. This week we are excited to highlight PyXtrem - one of the newest DevHigh5 projects.

We'll continue to distill, aggregate and share news related to the EMC {code} Community and industry happenings. We'll provide the content, but we need your feedback. You can always reach us at emccode@emc.com.

code.community

New DevHigh5 Project Highlight - PyXtrem

Last week we introduced five new DevHigh5 Open Source projects. Over the next five weeks, we will share a brief overview of these new projects.

[PyXtrem](#) is a project focused on creating a library of python modules in order to simplify the usage of XtremIO REST API. With this library, users can automate workflows related to XtremIO management functions such as adding/deleting an XtremIO volume, initiator or initiator group, consistency groups, creating snapshots on volumes or consistency groups, refreshing a snapshot and many more.

To view the library and learn more about this project, take a look at the [GitHub ReadMe](#) file for more information.

What are WE up to?

The team is heads-down planning for the upcoming events this spring. In particular we are looking forward to having a large presence at [EMC World](#) (May 2-5th) in Vegas and submitting CFPs for a variety of conferences like [DockerCon](#), [MesosCon](#) and [others](#).

Do you have an idea for an interesting session that you want to submit, but need another pair of eyes or feedback? Head on over to the #events channel on our [EMC {code} Community](#) and reach out to us. We can't wait to see what you come up with!
