

EMC {code}

Community Onramp for
Developer Enablement

"CODE OPEN, DEPLOY EVERYWHERE" - EMC believes in open source.
CODE is here to share and collaborate with developers worldwide.

HELLO WORLD

DockerCon Europe is under way, and our newsletter this week is appropriately Docker-themed. While you all might not be enjoying the paella in Barcelona post DockerCon, the {code} team is trying to share updates, free training, and news to help you stay on top of what's happening in the Docker community this week (and beyond).

We hope you'll enjoy this newsletter. We'll do our best to distill, aggregate and share news related to the {code} community and industry happenings. We'll provide the content, but we need your feedback. You can always reach us at emccode-newsletter@emc.com.

DockerCon Europe 2015

DockerCon is wrapping up in Barcelona, and there were a lot of interesting announcements and developments in the Docker Community.

EMC {code} attended to learn, network, and showcase some of the Docker-related projects we've been working on ([REX-Ray](#), [Docker Volume Driver interfaces for Mesos](#) & [more](#)).

We were excited to see that Docker is solidifying their platform strategy, with Swarm and Engine merging. Read more on [Docker's Blog](#) and the [video footage on the DockerCon web site](#).

Free Docker Workshop with Swarm, Storage, and Networking

EMC {code} was a sponsor at [WebSummit 2015](#) and gave a 3 hour Docker 1.9 Workshop. After a very successful test run, we are able to allow anyone to use the workshop at their very own convenience!

In the self-paced workshop, you'll learn:

- Docker basics, including docker run, Dockerfiles and more
- Docker 1.9 enhancements with storage and networking
- Data persistence with Docker
- and more!

[Read more about the training on our blog!](#)

Of course, we'd love to know how it goes for you, so feel free to drop us a line on [Twitter](#) or join our [CodeCommunity](#), where we have a channel dedicated to Docker training.
