

Welcome to the {code} Weekly, a Newsletter focused on the {code} Community, Team, open source and storage/container trends in the tech industry.

{code} Weekly Highlights

This week are celebrating the {code} Community's 2nd birthday! Thank you to all of you for joining and participating in the community!

There is a replay of a Docker Swarm workshop and information on a CNCF Kubernetes workshop. And the event list is getting longer. If you are going somewhere and we haven't listed it, let us know!

Have a great week!

{code} Community

Happy 2nd Birthday {code} Community! When the doors opened on June 18th 2015 we had no idea the community would grow this large in just 2 years.

The {code} Community now has over 3,700 members with two community programs:

- The DevHigh5 program where more than 65 open source projects have been published
- The {code} Catalysts program which opens dialogue across company borders and creates an ecosystem of open source advocates who lead and advance emerging technology to support software-based infrastructures

We posted a blog about the amazing work of the {code} Community, [make sure you read it!](#)

We are extremely grateful for your continued support, and want to send out a huge thank you to @everyone who has been a part of the {code} Community's journey - you rock!

{code} Org.

Docker Swarm Workshop

80 enrolled for {code} Catalyst Mike Coleman's [@Docker](#) Swarm workshop held on 15-June and {code} team member Steve Wong attended. Docker Evangelist Mike Coleman presented a 90 minute hands-on workshop where attendees deployed personal Swarm clusters on the Azure public cloud. If you missed it, the step by step lesson plan is here: <https://github.com/mikegcoleman/hybrid-workshop>.

CNCF Kubernetes Fundamentals

Earlier this year, the Cloud Native Computing Foundation (CNCF) unveiled a self-paced course entitled Kubernetes Fundamentals (LFS258). The course is a fantastic resource for anyone, end-users or developers, looking to get an introduction into the world of Kubernetes. The content and hands-on labs cover the building blocks for understanding key concepts and how to manage a Kubernetes cluster. Additionally, the course highlights and briefly touch upon some advanced topics that happening in the space, such as monitoring, third-party resources, and Helm just to name a few. This training comes highly recommend for anyone starting out or is interesting learning more about Kubernetes.

{code} Calendar

Upcoming:

GopherCon

Denver, CO
July 12-15, 2017

Join us and the Go community as we head to Denver for GopherCon. We will participate in various workshops on July 12th followed by a fantastic 2-day conference, and then a jam-packed community day on July 15th.

Open Source Summit NA

Los Angeles, CA
September 11-13, 2017
Register before June 18th to receive the early bird discount.

MesosCon NA

Los Angeles, CA
September 13-15, 2017
Register before July 15 to receive the early bird

We are especially excited to announce that [Ashley McNamara](#) (Go Enthusiast, {code} Catalyst and Principal Technologist at Pivotal) is a keynote speaker. Stay tuned for more details to come!

Visit the [site](#) for more information and sign up today !

discount.

Open Source Summit NA and MesosCon NA will be hosted back to back this September in LA. So if you are planning on heading to one of them, it's definitely time to consider both!

Stay tuned for more details on what the {code} Team has in store for these two events.

To stay up to date on where you can find the {code} Team, check out our calendar.

#Overheard

Build it and Bitcoin will come
