

**Welcome to the {code} Weekly, a Newsletter focused on the {code} Community, Team, open source and storage/container trends in the tech industry.**

## {code} Weekly Highlights

The Dog Days of Summer are here, but the {code} team is staying active. {code} team member Jonas highlights the Community Edition of Dell EMC Elastic Cloud Storage in the {code} Community section. Our team has been busy writing, so many {code} team blogs to choose from! The community has also been busy publishing and we have many articles on containers, open source, and tech in the {code} Industry section.

As event season is getting closer, we continue updating deadlines for the events in the {code} Calendar section. Check it out so you can join us (and we may have a registration code for you to use too : ) ).

## {code} Community

The ECS Community Edition is one of the projects that have been using the {code} Community Slack for communication and collaboration. ECS CE is a **free-as-in-beer** way to test out and play with a limited version of [Dell EMC® Elastic Cloud Storage \(ECS™\)](#).

ECS provides support for industry-standard object APIs like **Amazon S3, OpenStack Swift, EMC Atmos, and CAS**. In addition, ECS also includes native file support with NFSv3 and support for Hadoop file system data, which allows organizations to create Big Data repositories on ECS that Hadoop analytics can consume and process.

The project is taken care of by [Travis Wichert](#) as the primary contributor, with great efforts also coming from [Adrian Moreno](#), [Magdy Salem](#), [Ken Steinfeldt](#), and [Jason Cwik](#).

Wanna try it out? Available via the [Docker Hub](#) and [GitHub](#). Check out the [instructions here!](#)
