

EMC {code}

Community Onramp for
Developer Enablement

"CODE OPEN, DEPLOY EVERYWHERE" - EMC believes in open source.
CODE is here to share and collaborate with developers worldwide.

HELLO WORLD

Innovation is never in short supply in the open source world, it's even found in the sport of Drone Racing. This week we'd like to share some ways we have seen innovation. Such as our first major contribution to an Apache Foundation project, a project from our community member Karsten Bott - Labbuildr and lastly the tie between open source and Drone Racing.

We'll continue to distill, aggregate and share news related to the EMC {code} Community and industry happenings. We'll provide the content, but we need your feedback. You can always reach us at emccode@emc.com.

code.community

Community Member Spotlight: Karsten Bott

[Karsten Bott](#) started [labbuildr](#) as a small script 3 years ago. The goal in mind was to support EMC's data protection team with Windows test environments that verify EMC product functionality. It has since grown into a full-fledged PowerShell-based automation tool for building elaborate demo labs on VMware Workstation.

By using the included [Solution Packs](#) you can even set up a full [ScaleIO](#) cluster with Mesos, Docker and REX-Ray on top in just two clicks!

2016 US National Drone Racing Championships
August 5-7
Governors Island, NYC

We are excited to announce EMC {code} has been chosen to represent open source at this thrilling event. Get your free [General Admission tickets here](#). We'd love to see you there!

LinuxCon/ContainerCon NA

August 22-24
Toronto, Canada

Head to Toronto for the North American LinuxCon/ContainerCon to hear [Kenny Coleman](#) speak on Wed, August 24 at 11:55AM on [Highly Availability and Distributed Containers](#). Also, be sure to check out

-->Starting Download of https://labbuildrmaster.blob.core.windows.net/master/2012R2FallUpdate.7z
```

Using Labbuildr you can combine EMC technologies like Networker, Avamar, AppSync, ViPR/CoprHD, Isilon, Unity and ScaleIO with Windows hosts and software (automated Microsoft software downloads), VMware ESXi setups, or even Linux environments (such as Docker, OpenStack and Hadoop).

Bott has done a great job of creating a free and open source solution for demos and labs that EMC employees, partners and customers can use. Please have a look at [his work here](#) and make sure to read the [Student Guide](#) to get started with labbuildr.

Apache Mesos 1.0 Integrates {code} Projects for Experimental Storage Support

[Kendrick Coleman](#) provides an update on [Apache Mesos](#) in the blog this week. He writes that after a lot of hard work, Apache Mesos v1.0 includes experimental storage support from {code}. This is the first major contribution to an Apache Foundation project and we couldn't be more stoked to be contributors!

[Check out the blog](#) for more detail on this integration and how we are providing solutions for real problems.

the [Open Source Storage Summit](#) on August 25 following the conference.

Connecting EMC, Open Source and Drones! Oh My!

Community member and drone enthusiast [Matt Cowger](#) shared his excitement with us in the blog this week for the US National Drone Racing Championships.

The EMC {code} team and a few community members are heading to Governors Island, NYC to staff the Sky Lab (Virtual Reality and Gaming Wonderland). The Sky Lab will include three virtual reality headsets (HTC Vive) for real-time experiences and a multi-computer station for attendees to test their flying skills against the pilots' times on the actual course!

But what is the connection of open source and drones? Cowger provides some wonderful examples of how connected these two really are. Read through [his blog here](#).
