

## Community Onramp for Developer Enablement

"CODE OPEN, DEPLOY EVERYWHERE" - EMC believes in open source. CODE is here to share and collaborate with developers worldwide.

### HELLO WORLD

#### Greetings!

Let's start this week with a little bit of Big Data, courtesy of ESPN. For the NCAA Basketball tournament, only 14 people out of 11.57 MILLION picked every Sweet 16 team correctly. 0.00012%. What does this have to do with DevOps? Absolutely nothing! It just goes to show that most of you shouldn't give up your day job to become game pickers and you should focus more on learning from all the great content we have for you this week. And tell a friend to subscribe too, because their odds aren't good either.

We hope you'll enjoy this newsletter. We'll do our best to distill, aggregate and share news related to the {code} community and industry happenings. We'll provide the content, but we need your feedback. You can always reach us at [emccode-newsletter@emc.com](mailto:emccode-newsletter@emc.com)

#### March Madness: It's Conference Season!

Last week was a busy week for EMC {code} as conference season tipped off. Varrow, one of EMC's largest partners, held their annual conference in North Carolina- where DevOps was a big part of the conversation. EMC {code} Developer Advocates [Jonas](#), [Brian](#), and [Clint](#) led discussions around the enterprise transformation to DevOps, the DevOps Toolkit and Containers vs. VMs. Check out the presentations: [DevOps Toolkit](#), [Containers vs. VMs](#).

[The St. Louis VMUG](#) hosted Developer Advocate, [Kenny](#), as

Want to see all the upcoming events? Add the [EMC CODE Events Google Calendar](#)

the keynote speaker for the event. With a throwback to a classic track from NAS (the rapper, not the file system), "If I ruled the world," Kenny discussed the potential for organizations like VMware to learn from DevOps transformations and adapt quickly. [You can find his beautifully gif-laced slides here.](#)

On the West Coast, at [Scala Days SF](#), Developer Advocate [Rags](#) spoke on pushing Scala Apps to CloudFoundry. [Here's his presentation.](#)

[Kate](#) was in New York for [Write/Speak/Code](#), a women's conference focused on growing the technical (hands-on programming) and soft (presentation delivery, blogging) for skills women developers and developer community members. For all the ladies that read our newsletter, check out the [WriteSpeakCode meetups](#) if you'd like to get involved, and consider the conference when it comes around next year.

If you missed these events, we'll cover these topics and much more at [DevOps @ EMC World](#) (free event for all-with or without full EMC World passes).

### CloudFoundry Dojo Launches in EMC Cambridge!

Things are heating up in Boston (and it's about time after 7' of snow), and the EMC Kendall Square office (where EMC {code} is anchored) is quickly becoming a hub for Boston-based developers and DevOps professionals.

CloudFoundry and EMC are bringing a Dojo to EMC Cambridge this summer, with the goal of training over 150 developers. The concept of the Cloud Foundry Dojo is about rapid learning and development of applications through "pair programming" that puts developers shoulder-to-shoulder with Cloud Foundry gurus for 6-12 week open source projects designed to breed qualified Cloud Foundry engineers with "committer" status. This concept began in the coding Dojo of Pivotal Labs, which EMC acquired in 2012-and is now part of Pivotal Software.

## DevOps @ EMC World May 3, 2-7pm

LAS VEGAS, NV

Join EMC {code}, local meetup organizations, and peers to learn, network and grab a drink (on us) before EMC World. Free training includes: Infrastructure-as-code, Transforming for DevOps, and 101-level topics (Docker, CI/CD, CloudFoundry).

### [Register for your free pass here](#)

## KYOSS Meetup

LOUISVILLE, KY

Get your open source fix in with the KYOSS meetup, hosted by EMC. Call for topics still open!

### [Sign up here](#)

## code.learn

Interested in contributing to OpenSource but not sure where to start? It might seem daunting, but sometimes a contribution can be as simple as a typo or bug fix, or adding to documentation. These two resources are great for finding a project to get your feet wet with OpenSource-and to work on something outside of the realm of your day-to-day.

- [CodeMontage](#): Contribute to projects that help social causes, such as civic engagement, disaster relief, and international development.
- [OpenHatch](#): Access tools, community, and education to get started with contributing to OpenSource. Filter potential projects by difficulty and/or language skills needed.

We hope you enjoyed the seventh issue of the EMC {code} newsletter.
