

EMC {code}

Community Onramp for
Developer Enablement

"CODE OPEN, DEPLOY EVERYWHERE" - EMC believes in open source.
CODE is here to share and collaborate with developers worldwide.

HELLO WORLD

Although some of our readers are global, we'd like to wish everyone a Happy Thanksgiving. For those of you who are dreading time with your in-laws or weird cousins, we have the perfect excuse to spend your time elsewhere. You can just tell them you're busy because:

- You're working on your [#DevHigh5](#) Project
- You're planning your next trip to [an EMC {code} event](#)
- You're up to your eyeballs [in a Docker workshop](#)
- You're posting very insightful comments in the [CodeCommunity](#) (most certainly not gifs and gaming tips...)
- You're watching [every EMC {code} training module](#)

You're welcome! And if these don't work, good luck explaining to Grandma that containers are for much more than leftovers.

We hope you'll enjoy this newsletter. We'll do our best to distill, aggregate and share news related to the {code} community and industry happenings. We'll provide the content, but we need your feedback. You can always reach us at emccode-newsletter@emc.com.

DockerCon EU Recap 2015

Another DockerCon is in the books for the EMC {code} team. There were a few announcements from Docker, but the team was primarily there to see where the interests are headed. We were excited to learn about Docker 1.9, Docker Universal Control Plane, and to see persistent
