

Welcome to the {code} Weekly, a Newsletter focused on the {code} Community, Team, open source and storage/container trends in the tech industry

{code} Weekly Highlights

EEK! The excitement filled the halls of the Dell and EMC offices as the merger came to a conclusion yesterday (9/7/16) to form Dell EMC. We are delighted to announce our new brand as {code} by Dell EMC and we will continue our current focus on 3rd platform infrastructure, containers and be a resource for the open source community.

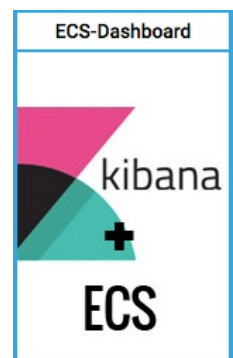

In this {code} Weekly we highlight a community project focused on Elastic Cloud Storage and a project put together by our interns, Proud Heng and Akira Wong.

{code} Community

The [ecs-dashboard project](#) from [Eric Caron](#) is a toolbox designed to make it easy for anyone to create, metricize and visualize [Dell EMC Elastic Cloud Storage \(ECS\)](#) metrics such as top users, detailed object reports, and usage by namespace, bucket and node. The toolbox contains three subsystems: ECS Metadata Collector, ElasticSearch Metadata Cleaner and Kibana Emailer. All of which make the ecs-dashboard project very simple to setup and use.

Try it out [HERE](#).

Summer of {code}

Over the summer we were fortunate to have [Proud Heng](#) and [Akira Wong](#) as our first {code} interns! Both wanted to get the most out of their internship and hit the ground running this summer learning as much as they could about containers, open source, and collaboration. Just before they head back to school it was fun to watch their research project lead to a presentation at an LA Linux Meetup, a blog and soon to be video demo. Check out their blog to run

Minecraft in a [Docker](#) container with [REX-Ray](#) for persistent storage.

{code} Industry

Containers:

- [Running WordPress on Kubernetes](#) by Phillip Tribble
- [What's VMware's Vision for Container Adoption?](#) by Tony Bradley

Open Source:

- [Student's open source project takes him around the world](#) by Sam Mawusee Foli-Awli
- [How Google created a new kind of open source program office](#) by John Mark Walker
- [Keeping DOS alive and kicking with open source](#) by Jason Baker
- [OpenOffice, after years of neglect, could shut down](#) by Jon Brodtkin

Other Tech News:

- [Git 2.10 has been released](#) by Jeff King
- [Multi-process Firefox brings 400-700% improvement in responsiveness](#) by John Mannes
- [Where will DevOps be in 10 years' time?](#) by Michael Schmidt

{code} Calendar

Dell EMC Forum - Dallas, TX
September 13, 2016

Join us for this free one-day technology event where you can connect with peers, discover industry trends and so much more! At the event, the {code} team will be hosting a virtual reality area to experience the next step in the gaming industry.

LinuxCon/ContainerCon EU - Berlin, Germany
October 4-7, 2016

Head to Germany to hear [David vonThenen](#) on October 6 at 5pm on "[Game Changer: Software Defined Storage and Container Schedulers](#)." On Friday the 7th, we will also be hosting an [Open Source Storage Summit](#).

If you haven't already... [register HERE!](#)

To stay up to date on where you can find the {code} Team, check out our calendar.

#WhereDoYouCode

Last week [Kenny Coleman](#) shared this fun location to both play and code.

Do you have a favorite place you like to hide out? Maybe your favorite haunt for focusing on those really troublesome coding problems? Send us a tweet with the hashtag #WhereDoYouCode! We want to feature you in the {code} Weekly!

We hope you enjoyed the 81st issue of the {code} Weekly.
