

# EMC {code}

Community Onramp for  
Developer Enablement

"CODE OPEN, DEPLOY EVERYWHERE" - EMC believes in open source.  
CODE is here to share and collaborate with developers worldwide.

## HELLO WORLD

The probability of a baby being born on Leap Day is somewhere around 1/1461; however the probability of EMC {code} making a huge splash at EMC World in Vegas this year is at least 1/1. *We think that's a pretty safe bet.*

Over the next 8 weeks (can you believe it, only 8 more weeks to Vegas, baby) we will post the details on just how big of a splash we intend to make at EMC World. Read more in this newsletter for the first EMCW update, and for another overview on one of the DevHigh5 projects.

We'll continue to distill, aggregate and share news related to the EMC {code} Community and industry happenings. We'll provide the content, but we need your feedback. You can always reach us at [emccode@emc.com](mailto:emccode@emc.com).

## code.community

### New DevHigh5 Project Highlight - EMC-Zabbix-Integration

So far we have introduced the DevHigh5 project [PyXtrem](#), [XtremPerfProbe](#) and [Generator-servicenow-reactjs](#). This week we continue the new DevHigh5 project exploration with an overview of EMC-Zabbix-Integration.

[EMC-Zabbix-Integration](#) was developed to integrate EMC VNX storage into the open source monitoring tool [Zabbix](#). This project provides a way to implement integration of the data from EMC VNX and CLARiiON based systems with certain features from Zabbix, such as low level discovery, application based separation and visualization.

`code.overheard`

Got an email from Mint saying I spent \$742.00 on pants in the last 30 days.

Sigh.....it was

For more information on EMC-Zabbix-Integration please take a look at the [GitHub ReadMe](#) file.

## code.team

### EMC {code} at EMC World Only 8 more weeks!

We are thrilled to be making our way to [EMC World](#) in Vegas May 2-5. The theme this year is Modernize. This is right up our alley.

To begin let's focus on the IT Leadership sessions that EMC {code} will be providing. Below are quick links to the four that are currently posted on the EMC World Session Catalog. As more of our talks are posted to the session list we will be sure to highlight these. In addition we will continue to provide updates on EMC {code} at EMC World this year.

- [Open Source has Changed how you run Infrastructure](#)
  - Josh Bernstein, VP of Technology
- [Unstructured and Structured PaaS Demystified](#)
  - Jonas Rosland, Developer Advocate
- [Containers are Not Cloud Native](#)
  - Clinton Kitson, Technical Director
- [Adopting an Open Source Strategy](#)
  - Mohamed Khalid and Kenny Coleman, Developer Advocate
