EMC {code}
Community Onramp for Developer Enablement

"CODE OPEN, DEPLOY EVERYWHERE" - EMC believes in open source. CODE is here to share and collaborate with developers worldwide.
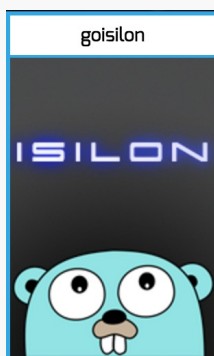

HELLO WORLD

With a week between conferences the team took time to reflect on EMC World and to prepare for OSCON. Take a look below for more and learn about another community project - Isilon SDK.

We'll continue to distill, aggregate and share news related to the EMC {code} Community and industry happenings. We'll provide the content, but we need your feedback. You can always reach us at emccode@emc.com.

code.community

Isilon SDK Launches Into Open Source

As the open source initiative for EMC we love the opportunity to guide other teams into establishing their own open source projects. We walk these teams through this transition from closed source to open source and for Isilon SDK it has finally become a reality.

With this SDK you can now add bindings to your applications in order to access the OneFS API on an Isilon cluster. This will make it much easier to programmatically manage your Isilon cluster and paves the way into treating your infrastructure as code!

For more head to the repo or check out the documentation here.

OSCON
May 16-19th
Austin, TX

This year we have THREE sessions at OSCON, read more about our presence in the code.team section!

Click here to register and use the code SPEXPO for your free expo plus pass to OSCON.

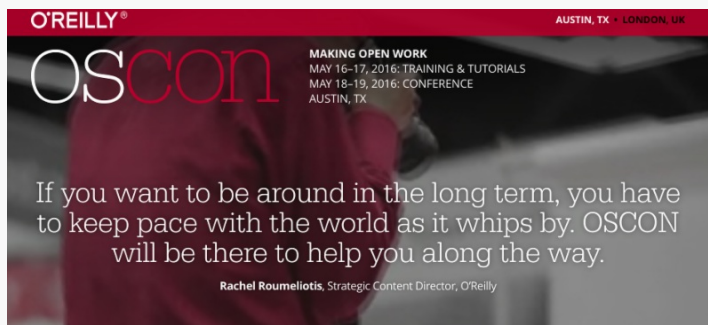

MesosCon
June 1-2
Denver, CO

First Time Sponsor at OSCON 2016

The largest and longest running open source conference in the US begins on Monday the 16th in Austin, TX. Last year the team attended to get a lay of the land, and to learn more about the open source community. This year the team is ready to return to OSCON as a first time sponsor. Not only do we have a booth this year but we also have three sessions:

- Open source has changed how you run infrastructure
  - Joshua Bernstein, VP of Technology for ETD, EMC
  - Wednesday, 4:20PM
  - Room 16A
- Highly available persistent applications in containers
  - Clint Kitson, Technical Director, EMC {code}
  - Thursday, 11:05PM
  - Room 17B
- Managing a large open source community with smart tools
  - Jonas Rosland, Developer Advocate, EMC {code}; and Stephanie Carlson, Marketing Associate, EMC {code}
  - Thursday, 5:10PM
  - Room Ballroom E

As you make your way through the sessions and Expo Hall, don't forget to attend these talks and be sure to stop by the EMC {code} booth (#715) to pick up your rubber duck that will help you through the next tough bug.

EMC World 2016: Taking the world by {code}

Another EMC World is now under our belt and we feel that we've accomplished more than ever. We had a large presence with 21 breakout sessions, a Guru session together with Joshua Bernstein (VP of Technology, ETD) Tobi Knaup (CTO and Co-Founder of Mesosphere), 8 partners in

Steve Wong is co-speaking on Thursday, June 2 from 4:20-5:10PM on Marathon meets External Storage.

Click here to register for MesosCon and visit with the EMC {code} team.

DockerCon
June 20-21
Seattle, WA

On the 21st, Jonas Rosland will be speaking at 11:15AM in the Contribute and Collaborate Room on "Open Source is good for both business and humanity."

Click here to register for DockerCon and visit with the EMC {code} team.

Want to see all of our upcoming events? Check out the EMC {code} Events Google Calendar to stay up to date!

`code.overheard`

"Java is to JavaScript as Car is to carpet."

our booth, a self-paced vLab,a new initiative release and a cubic meter of rubber ducks! Read through the blog here.

Personal Reflection on EMC World 2016

Steve Wong was inspired earlier this week following his experience at EMC World. Check out his reflection on EMC World and how impactful this experience was on an EMC veteran, but an EMC World newbie.

Containers:

- From Containers to Container Orchestration
- Docker Launches a Vulnerability Scanner for Containers
- Twistlock beefs up container runtime security with new tool
- Docker Security Scanning safeguards the container content lifecycle

Open Source:

- An in-depth guide to turning a product into an open source project
- I am your user. Why do you hate me?

It's Fine. Don't Fight It.
Six Steps to Programmer's Zen

It is not always sunshine and rainbows being a developer. Sometimes you need just a little help to get you through that slump, late night coding or tough bug. Here's a [list of tips/tricks](#) that just might help you get back to programmer's zen.

We hope you enjoyed the 64th issue of the EMC {code} newsletter.
