Welcome to the {code} Weekly, a Newsletter focused on the {code} Community, Team, open source and storage/container trends in the tech industry.

{code} Weekly Highlights

The team has been hanging out in the expo hall in Berlin this week for LinuxCon and ContainerCon. Read below for more details on our time here and to learn what the keynotes covered!

{code} Community

As is tradition, at large open source conferences the {code} team arranges community dinners. This past Tuesday at LinuxCon/ContainerCon Berlin we invited community members to join us for a night filled with german food, drinks and great conversation. We went to the oldest biergarten in Berlin, the Prater Gaststätte, where the discussions ranged from containers to broken database schemas to finding love. The {code} team appreciates our community full of easy-going and fun members with diverse interests. You make our events so much fun.

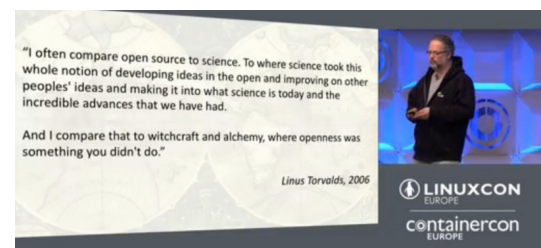

Again, thank you all for joining us this past Tuesday and we hope to see you at another event soon!

Do you want to be a part of these community dinners? Reach out to Jonas Rosland on our {code} Community Slack!

{code} Org.

The keynotes at LinuxCon/ContainerCon EU this week have not disappointed. Chris Schlaeger spoke about 10 lessons learned in 10 years of EC2, project InfraKit open sourced live in traditional keynote style from Solomon Hykes (Founder of Docker) and the CTO of Suse, Thomas Di Giacomo presented an homage to Mr. Robot as "We are LSociety" encouraging us to maintain open source values.

During the closing keynote session (the latest trend to wrap up a conference) we heard about the continued

push of community around open source and how tech companies have begun to influence open source software. One of the main things tech companies are doing is providing paid positions to work in open source like our team here at {code}. It's incredible to see the influence that companies now provide to the open source community.

[Head to the Linux Foundation YouTube channel for the recorded keynotes next week.](#)

{code} Industry

Containers:

- [Bringing Pokémon GO to life on Google Cloud](#) by Luke Stone
- [When two tribes go to war: Docker Swarm on the left, easier-to-install Kubernetes on the right](#) by Thomas Claburn
- [Who wants to run my container?](#) by Jorg Schad and Jie Yu

Open Source:

- [pyflame - Python flame graph tool](#) by Evan Klitzke
- [Apache Syncope Offers Open Source Single Sign-On Identity Management](#) by Susan Hall
- [Open source drives companies to change hiring and development](#) by Bruce Momjian

Other Tech News:

- [The latest Humble Bundle offerings](#)
- [The History of Pets vs Cattle and How to Use the Analogy Properly](#) by Randy Bias
- [On Phone Numbers and Identity](#) by Philip Martin

{code} Calendar

[Dell EMC Forum](#) - New York City, NY
October 13, 2016

Join us for this free one-day technology event where you can connect with peers, discover industry trends and so much more! At the Forum, the {code} team will be hosting a virtual reality area to experience the next step in the gaming industry.

[Drone Worlds](#) - Kualoa Ranch, HI
October 19-22, 2016

We are excited to announce {code} has been chosen to represent open source again at this year's Drone Worlds! What a thrilling event. Join us in Hawaii, [admission is free](#). We'd love to see you there!

If you can't make it to the event, you can always watch it live! More details to come.

[To stay up to date on where you can find the {code} Team, check out our calendar.](#)
