HELLO WORLD

With just days left in the month of April, it can only mean one thing - EMC World is right around the corner. All of our planning and hard work is coming to a close and now we turn our focus towards to executing an amazing experience for all. If you are not attending EMC World this year be sure to follow us on Twitter and keep an eye on the blog for live updates.

We'll continue to distill, aggregate and share news related to the EMC {code} Community and industry happenings. We'll provide the content, but we need your feedback. You can always reach us at emccode@emc.com.

Kickstarting Modernization Through the Cloud

Part of what makes the EMC {code} team successful is the connections to both individuals in the EMC {code} Community and partners. One such partner that we are excited to have the opportunity to feature is Cloud 66. This week the CEO and Co-Founder of Cloud 66, Khash Sajadi took to our blog to speak about his excitement around EMC World and the innovation inside tech.

Sajadi writes that "in order to remain relevant, enterprises are left with no other choice than to adapt their tried and tested methods to herald in the new." He continues to address the importance of being agile and flexible while also recognizing the need for "a seismic cultural shift." Visit the blog for more!

EMC World
May 2-5th
Las Vegas, NV

Check out the session catalog for a list of talks and tracks available at EMC World this year.

Click here to register.

OSCON
May 16-19th
Austin, TX

Jonas Rosland and Stephanie Carlson will be

MesosCon
June 1-2
Denver, CO

Register for MesosCon and visit with the EMC {code} team.

EMC {code}'s Countdown to EMC World
3 Days - May 2nd-May 5th

Each day at EMC World promises to pack a punch. That punch will be full of technical content and fun. A portion of this content will be delivered by our eight partners that are joining us in the EMC {code} booth this year. Our partners are:

- AVI Networks
- Cloud 66
- Docker
- GitHub
- Mesosphere
- Puppet
- RackHD
- Rancher

Each partner has a demo pod and a few speaking opportunities in the EMC {code} booth Theater. So while you are wandering the Expo Hall at EMC World between our Code and Modern Operations sessions, swing by the EMC {code} booth to visit with our partners and check out a presentation or two. You won't be disappointed.

Enhancing Persistence with Open Source Infrastructure

The team is stoked to be a first time sponsor at OSCON this year. As part of this opportunity we were able to feature a blog post written by Clint Kitson.

code.overheard

"At my age I try not to let myself get bored. No nincompoopery allowed."

For feedback, topic ideas, or

In this post Kitson writes: "If we agree that adopting containers across the industry is a useful goal, containers are going to need some sort of persistence..." What is exciting is that we are delivering this through the open source project, REX-Ray." For more visit the blog here.

Quenching That Uncontrollable Thirst for New Projects

We are always looking for another fun project. What about you? Here we found a guide from Off-The-Shelf-Hacker on how to create a steampunk eyeball.

We hope you enjoyed the 63rd issue of the EMC {code} newsletter.
