Welcome to the {code} Weekly, a Newsletter focused on the {code} Community, Team, open source and storage/container trends in the tech industry.
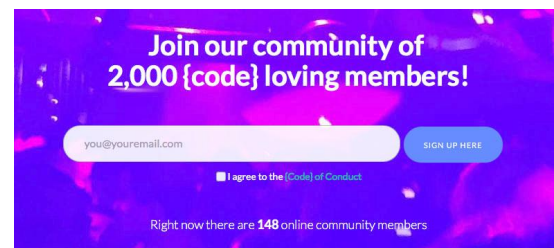

{code} Weekly Highlights

Check out the details below on our latest milestone - 2,000 {code} Community members. And if you missed it, we released v0.2.0 of the project ScaleIO Framework for Mesos today!

{code} Community

The {code} Community reached a huge milestone last week! We now have over 2,000 open source focused members! With over 330,000 messages and 4,700 files shared over the past year and a half, our dedicated members continue to share projects, war stories, funny anecdotes and of course programming support.

When we started the {code} Community Slack team a little over a year ago we had no idea we would reach so many smart and innovative people this quickly. We are humbled and thankful for each person who participates in collaborating on projects, sharing knowledge, being supportive and of course simply being amazing members of the open source community.

We look forward to continue working with and growing the {code} Community with more projects and members.
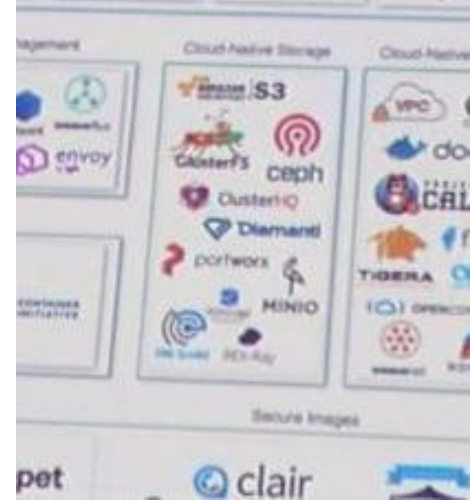

You all rock!

Want to join in on the fun? Head over to codedellemc.com/community and sign up today!

{code} Org.

This week the {code} team was over at KubeCon and during the first keynote by Dan Kohn, the Executive Director of Cloud Native Computing Foundation (CNCF) shared a slide focused on the Cloud Native Landscape (v0.9). Among others, {code} and specifically REX-Ray, was pictured as a Cloud Native Storage solution. *Thanks Dan for the call out!*

For us, this really speaks to the focus of {code} - storage solutions for container platforms, including Kubernetes. The team has a proven track record of making successful storage technologies available to modern and open source infrastructure. Take these solutions on a test run through our new {code} Labs repo!

For more on these storage solutions visit our blog.

{code} Industry

Containers:

- Running Online Services at Riot: Part II by Kyle Allen and Carl Quinn
- Microsoft open sources its Azure Container Service Engine and launches deeper Kubernetes integration by Frederic Lardinois

Open Source:

- 5 open source dashboard tools for visualizing data by Jason Baker
- Writing Your Own Programming Language by Marcio Klepacz

Other Tech News:

- So you think you know C? by Oleksandr Kaleniuk

{code} Calendar

Dell EMC Forum - Long Beach, CA
November 30, 2016

Join us for this free one-day technology event where you can connect with peers, discover industry trends and so much more! At the Forum, the {code} team will be hosting a virtual reality area to experience the next step in the gaming industry.

Mars Challenge Hackathon at LISA16
Boston, MA, USA
December 6-7, 2016

You and your team have just landed on Mars. As you prepare the base, massive sun storms are coming your way. Your protective shields can run for a only few minutes at a time without recharging.

To make sure your team survives, you have to monitor the environment, adapt your algorithms and automatically charge and raise shields when needed.

Join us for the event here!

To stay up to date on where you can find the {code} Team, check out our calendar.
